

Dual Credit Program

What is your plan for college?

ADVANTAGES School International offers a dual credit program in partnership with Arizona State University. This program gives current high school students the opportunity to take college classes while earning their high school diploma. These dual credit courses give students a head start in college. Through the ASI dual-credit program, students earn credit that goes toward their high school requirements, and at the same time, they also earn college credit.

Who can enroll in Dual Credit courses?

Dual credit courses are available for ADVANTAGES students in the 11th and 12th grades. Students must have a 3.0 GPA and must meet the prerequisites.

Dual Credit vs. AP courses

AP courses allow students to take college-level courses taught by a high school teacher, with the potential for students to earn college credit and/or course placement based on the results of an AP exam. Determination of scores for course placement and college credit is determined by the college/university to which the student sends the results of the AP exam. College credit is not guaranteed.

ADVANTAGES' Dual credit courses are college classes facilitated by an ASU instructor. This provides an opportunity to earn college credit while still in high school. Students taking classes for dual credit should work closely with ASI's enrollment team to ensure appropriate courses are selected. Dual credit courses carry the same weight on your transcripts as APs. College credit is guaranteed.
